DrivePro 550

Transcend's DrivePro 550 is a dual lens dash camera that provides both drivers and passengers with optimum protection. The front lens features a STARVIS image sensor and wide field of view for capturing crystal-clear Full HD 1080P videos at 60fps, while the 180° rotatable rear lens is equipped with an Exmor sensor and four Infrared LEDs, allowing sharp in-car video recordings at night and in low light conditions.

Dual lens, double the safety

With its dual lens, the DrivePro 550 provides both drivers and passengers with optimum protection. It comes bundled with a Transcend microSD memory card built of high-quality NAND flash and tested under harsh environmental conditions.

Vision in the dark

The DrivePro 550's front lens is equipped with a STARVIS™ sensor to capture high-resolution images in superb, rich color even in low light. Supporting 1080P Full HD recording at 60fps, the front lens offers smooth footage as well as crisp still images.

Note: STARVIS is a trademark of Sony Corporation.

Rear lens with Infrared LEDs

The rear-lens camera uses an Exmor™ sensor that records in 1080P Full HD at 30fps. It has four infrared LEDs that will automatically turn on in dim light. This greatly improves recording quality inside the cabin, even in pitch-black darkness.

Note: Footage recorded with infrared LEDs will be in grayscale. Exmor is a trademark of Sony Corporation.
