M.2 SSD Enclosure Kit

Transcend's CM42 and CM80 are enclosures in different form factors designed specifically for M.2 SATA SSDs. By following the step-by-step installation guide, you can transform an M.2 SATA SSD into a portable USB 3.1 Gen 1 external drive, maximizing utilization.

Sleek, pocketable design

Transcend's M.2 SSD enclosure features a lightweight aluminum construction, making it both portable and durable while you are on the move. A LED indicator lets you know when the drive is in use.

USB Type-A and Type-C supported

To accommodate devices with different USB ports, the M.2 SSD enclosure is engineered to convert to a USB Type-C port, offering flexibility of being used on different platforms with either USB Type-A or Type-C port.

*Note: A USB Type-C to Type-A cable is included. Users will need to provide their own adapter or compatible cable to attach the M.2 SSD enclosure to USB Type-C devices.

Enhanced performance with UASP

The M.2 SSD enclosure uses the USB 3.1 Gen 1 interface incorporated with UASP (USB Attached SCSI Protocol) that makes transfer speeds faster than with a sole USB 3.0 interface when used with a UASP-enabled host computer.
