DrivePro™ Body 30

Transcend's DrivePro Body 30 features STARVIS™ image sensor and infrared LEDs to capture high-resolution images in low light. Up to 12 hours of battery, high storage capacity, and high resistance to water, dust, and shock are ideal for public safety professionals. The package also includes useful accessories and value-added software that facilitate users in using the device and managing the files.

STARVIS™ High-sensitivity Image Sensor

The DrivePro Body 30 features STARVIS™ sensor to capture high-resolution images with superb, rich color even in low light. Images are highly detailed with low noise and excellent balance between light and dark areas.

Infrared LEDs for Night Vision

The DrivePro Body 30 has four infrared LEDs that will automatically turn on in dim light to enhance night vision capabilities. This can drastically increase recording quality in pitch-black darkness.

Image Enhancement Technology

DrivePro Body 30 features image enhancement technologies such as Wide Dynamic Range (WDR) and High Frame Rate (HFR) technologies, supporting high-quality recording at 60fps. Essential details can still be presented even in low, dim light.
